COVID-19 remains a major threat specially on the health and economy of every country and according to health experts, community transmission may remain significantly high specially in areas where vaccination coverage against COVID-19 is low;

WHEREAS, the World Health Organization and the Department of Health recommend widespread vaccination in order to combat the spread of COVID-19, protect those who cannot be vaccinated by reason of age and health condition, safeguard the capacity of the local health care system, and prevent unnecessary and premature deaths;

WHEREAS, despite availability of COVID-19 vaccines, many eligible individuals are not yet vaccinated citing reasons which include but not limited to the following; health conditions, religious belief, fear, vaccine brand preference, schedule problem and hesitancy or non-believer to vaccination;

WHEREAS, due to the continuous threat of community transmission of COVID-19, additional layers of protection in certain indoor settings where COVID-19 transmission is more likely to occur must be considered to avoid further negative impacts on the health and economy of the community;

WHEREAS, in light of the IATF recommendation to lower the alert level in some localities including the Municipality of Los Baños, requiring vaccination of all eligible individuals who frequent indoor establishments that allow groups of unassociated individuals to interact for long periods of time where customers or patrons remove their masks to eat or drink, engage in heavy physical exertion, or do not adequately physically distance, will provide the strongest protection to the health and safety of the residents of the municipality, including those who for reasons of age or health cannot be vaccinated;

WHEREAS, requiring vaccination or proof of a negative COVID-19 test for large outdoor events will address several factors that increase the risk of transmission at those events, including crowding, prolonged exposure, removal of masks for eating or drinking, and the increased likelihood contagious persons are present when a larger number of people are gathered;

WHEREAS, requiring vaccination for individuals who enter government and private buildings and/or offices will protect the health and safety of the municipality's workforce who themselves must be vaccinated and will protect the public health at large;

WHEREAS, the Municipal Government of Los Baños has an absolute interest in increasing vaccination rates which, in turn, will help curve the spread of COVID-19 and protect its constituents and visitors against a disease that threatens the health, safety, and well-being of everyone;

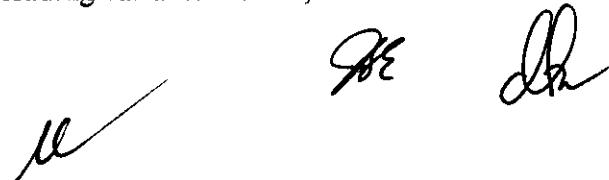

WHEREAS, the Municipal Government of Los Baños seeks to promote the health, safety, and welfare of its constituents, to protect its workers, and to encourage vaccination, by requiring proof of full vaccination with a COVID-19 vaccine to enter establishments or locations and events within the municipality that allow for higher-risk interaction, and government/private buildings or offices where workers put themselves at risk to provide services to the general public;
